time limit per test: 1 second

memory limit per test: 256 megabytes

input: standard input

output: standard output

Ehab has an array a of length n . He has just enough free time to make a new array consisting of n copies of the old array, written back-to-back. What will be the length of the new array's longest increasing subsequence?

A sequence a is a subsequence of an array b if a can be obtained from b by deletion of several (possibly, zero or all) elements. The longest increasing subsequence of an array is the longest subsequence such that its elements are ordered in strictly increasing order.

Input

The first line contains an integer t — the number of test cases you need to solve. The description of the test cases follows.

The first line of each test case contains an integer n ($1 \leq n \leq 10^5$) — the number of elements in the array a .

The second line contains n space-separated integers a_1, a_2, \dots, a_n ($1 \leq a_i \leq 10^9$) — the elements of the array a .

The sum of n across the test cases doesn't exceed 10^5 .

Output

For each testcase, output the length of the longest increasing subsequence of a if you concatenate it to itself n times.

Example

input	Copy
2	
3	
3 2 1	
6	
3 1 4 1 5 9	
output	Copy
3	
5	

Note

In the first sample, the new array is $[3, 2, \mathbf{1}, 3, \mathbf{2}, 1, \mathbf{3}, 2, 1]$. The longest increasing subsequence is marked in bold.

In the second sample, the longest increasing subsequence will be $[1, 3, 4, 5, 9]$.

Codeforces Round #628 (Div. 2)

Finished

→ Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.
